

ELBA mask

Mounting: the mask is fastened with four rubber bands. Bulb 12V.35W, directional (high beam and low beam).

WARNING: Headlights and masks on off-road motorcycles usually wear out due to frequent shocks. Therefore, always check the headlights on your motorcycle first before riding after dark. Make sure that you have carried out the installation exactly according to the above instructions. If a headlight were to fall off, it could hit the front wheel and cause a serious accident that would result in serious injury or death. Do not attach the cables with mounting straps to the number plate. Use the supplied leashes. Check that all cables, hoses are working properly before starting out. Rubber mounting tapes are items that will gradually deteriorate due to airborne pollutants. Therefore, always check them before you drive off. Never drive off if the headlights are not properly attached.

Dispose of the product environmentally at the end of its life.
