

## NO - TOIL air filter cleaner

### Instructions for use:

No-Toil air filter cleaner is effective only with NO-Toil oil. 1) For hand washing: fill a container with about 10 cm of warm water, add ¼ capful of No-toil wash, stir until the powder dissolves, immerse the air filter in the water bath and rinse until the filter is clean, rinse the washed filter with clean water, carefully squeeze the water out of the filter (do not force!) and leave to dry freely. If you are washing the filter by hand, soap your hands when you have finished washing and then sprinkle a small amount of No-Toil cleaner on your hands and wipe your hands clean with a wringing motion. 2) For machine washing: put the dirty filters in the washing machine, add ½ cap of No-toil cleaner, add another ½ cap of washing powder, set the wash cycle to warm water and low wringing speed.

### Warning:

Always follow the manufacturer's instructions. The cleaner is not suitable for cleaning paper filters. If the cleaner gets into the eyes, rinse immediately with cold water. If swallowed, drink plenty of water or milk and seek medical attention immediately.

Dispose of the product in an environmentally friendly manner.
