

Replacement screws for motocross helmets

REPLACEMENT:

Attach the screws to the helmet where the original screws were attached.

Unscrew all screws one at a time and remove them from the shell. Put on the new visor and screw in all the screws and washers one by one.

When disassembling and reassembling the visor, take care not to lose the supplied washers, check the correct positioning of the visor when reassembling. Be careful not to over tighten the threads on the screws.

The manufacturer is not responsible for improper use or improper installation.

Dispose of the product in an environmentally friendly manner at the end of its useful life.
